📍 Vilnius, Lietuva

Maria Čapkovska

Python Developer

SUMMARY

BSc Psychology graduate, turned programmer. I am seeking a challenging position that will consolidate my various types of experience and help develop new skills. I am ambitious, creative and can work effectively in a team or alone.

SKILLS

Python	Advanced
SQL	Beginner
HTML/CSS	Beginner
Viešas kalbėjimas	Expert
Excel	Intermediate

LANGUAGES

Anglų	Fluent
Lenkų	Native
Lietuvių	Native
Rusų	Intermediate
Prancūzų	Basic

EXPERIENCE

Python Developer/ Investment Analyst
Intrum GBS
06/2021 - Present

I am working on automating certain internal reporting procedures using Python. I have already independently developed a code that is estimated to save my colleagues at least 3h of work every month and eliminate the likelihood of errors in the reports.

Vyresnioji Programavimo Mokytoja (freelance)
Blueshift Creative Coding
08/2019 - Present

I teach Python and Scratch to children 5 to 13 years old. During the lessons, we explore various programming concepts by developing games and animations. I prepare the lesson content and plan everything myself.

Rinkos tyrimų asistente
Neuro Insight
09/2018 - 11/2019

Amongst my various responsibilities, I analysed the research footage, time-coded relevant actions and behaviours. While doing this I managed to develop a workflow that allowed me to reduce the time it took to time-code the videos by half.

EDUCATION

Data Science
Turing College Lietuva
2021

I only finished the first module of the course, but it taught me the basics of Python for Data Analysis as well as various other libraries that have been very useful.

Psychology
University of Greenwich
2020
Bakalauras

During the 1st year, I was chosen to be the Student Representative for my course. This meant I was a mediator between the lecturers and students and I helped improve the content of the course to tailor it to the needs and expectations of the students better. I graduated with a 2:1 (63%).
